

Sunscreen Information

We use Rocky Mountain SPF 50 sunscreen for child use in the center during the months of May-September. You can find more information, including ingredients, at www.rmsunscreen.com. If during the first week of application your child is sensitive to Rocky Mountain, we will refund your money and ask you to bring in your own sunscreen.

If you are not using Rocky Mountain, families must bring in personal sunscreen by May 1st. Please check the ingredients to make sure it is nut-free (no nut oils or coconut oil). We also require a lotion. No aerosol or pump sprays, due to breathing difficulties and staining it causes. Thank you!

Sunscreen is not applied at the morning drop-off outdoor time (prior to 8:30am). Teachers are not able to supervise the playground/classroom and talk with parents while applying sunscreen plus it must be applied 20-30 minutes prior to being outside for it to be effective. If you would like sunscreen on during this outdoor drop off time, you must apply it at home. It will be applied at the center before the mid-morning outdoor time and the afternoon outdoor time.
